Test case:

Checking and the ability to change the status of the car.

Step-by-step:

First, we select the item we are interested in (11), then we see a list of cars with their statuses. Then we select the car number whose status we want to change and change it to one of the proposed ones.

Resultado esperado:

When entering the number 11, the list of cars is displayed correctly, if there are no cars, a certain message is displayed. When selecting a car, the status that can be changed can only be 'in queue', 'in repair', 'completed'. After these actions, I should see a message that the vehicle status has changed.

Result obtained:

The result obtained meets expectations.
